

Store, Treat, and Dispose of Mixed Low-Level Wastes

Strategies

1. Eliminate the stored backlog in CWC by FY 2008
2. Perform TSD functions cost effectively
3. Maximize the use of 2706-T capabilities and local companies with unique capabilities for decontamination and treatment
4. Process and dispose of waste from other DOE sites and authorized Federal agencies
5. Develop a project management plan for RH-MLLW by June 1999 (TPA milestone M-91 requirement)
